Professional Summary

Backend Engineer with 3.9+ years of experience building scalable SaaS and CRM systems using Laravel and PHP. Specialized in performance optimization, payment systems (Stripe), and modernizing legacy architectures. Proven track record of handling production systems serving 10k+ users, improving system performance by 40%, and designing reliable, scalable backend solutions.

Technical Skills

Backend: PHP (OOP), Laravel, REST API Design, MVC, SOLID Principles, API Development

Frontend: Filament, Livewire, Next.js, Firebase (Working Knowledge)

Database: MySQL, MariaDB, Query Optimization, Indexing, Eager Loading

Architecture: RBAC, Queue Systems, Cron Jobs, Scalable System Design, System Architecture

Integrations: Stripe, TransUnion API, Firebase, AWS SES/SNS, Google Maps API

Tools: Git, GitHub, AWS EC2, Linux, Postman, JIRA

Productivity: AI-assisted development (ChatGPT, Cursor)

Key Projects

Property Management System (SaaS CRM)

- Developed a large-scale Laravel-based property management platform with multi-role architecture and complex business workflows.
- Designed and implemented Role-Based Access Control (RBAC) system supporting multiple user types with fine-grained permissions.
- Designed and implemented a custom Stripe payout system enabling transfers to multiple bank accounts, overcoming default per-currency payout limitations.
- Built scalable backend systems handling high-volume transactions and critical financial operations.

Property Management CRM Migration

- Migrated legacy PHP system to Laravel + Filament, improving maintainability across 50+ modules.
- Designed scalable RBAC system and implemented queue-based processing for 10k+ daily background jobs.

Catering Order Management System

- Built a Laravel-based catering management platform enabling end-to-end operations, including order lifecycle management, pricing logic, and secure payment handling.
- Designed scalable workflows for handling multiple orders and business operations.

Furniture Catalogue Platform (Ongoing)

- Building a modern furniture catalogue web app using Next.js, Firebase, and Firestore.
- Implemented Google Firebase Authentication for secure user login.
- Accelerated frontend development using AI-assisted tools, reducing development time and improving UI iteration speed.

Professional Experience

Developer

Apr 2024 – Present

Web Techno Softwares

- Leading migration of a large-scale Property Management CRM from legacy PHP to Laravel, improving modularity and scalability.
- Architected and implemented RBAC system supporting multiple user roles and secure access control.
- Integrated third-party services including Stripe (payments, onboarding, identity verification), TransUnion, Firebase, and AWS services.
- Improved system performance by 40% by optimizing database queries, implementing indexing strategies, and resolving N+1 issues.
- Reduced duplicate gate check records from 300+ to 30, significantly improving data consistency and operational efficiency.
- Designed queue-based background processing system handling 10k+ daily events.
- Developed and maintained 50+ backend modules supporting core business workflows in a production SaaS system.
- Leveraged AI-assisted development tools to accelerate development cycles and improve debugging efficiency.
- Implemented advanced Stripe payout workflows enabling flexible multi-account financial operations.
- Resolved critical production issues, minimizing downtime in payment and onboarding systems.

Web Developer

Nov 2023 – Feb 2024

Fistreet Systems

- Developed backend modules for a Catering Order Management System using Laravel.
- Built end-to-end order workflows, admin panels, and secure payment features.
- Managed deployments and resolved production issues in a fast-paced environment.

Web Developer

Nov 2022 – Oct 2023

Webitute

- Built an e-commerce and quotation platform with integrated payment gateway.
- Developed cart systems, quotation logic, and Excel-based import/export pipelines.
- Automated email workflows and delivered reliable client-facing features.

Junior Web Developer

Jun 2022 – Oct 2022

Web Techno Softwares

- Contributed to CRM module development using Laravel and CodeIgniter.
- Improved bug resolution speed and development turnaround time.

Education

Bachelor of Computer Applications (BCA)

2019 – 2022

Lachoo Memorial College, Jodhpur

Score: 84%
